

Ce qu'on a fait :

Mercredi

거품이 커핏물을 머금으면서 물줄기가 더 가늘고 다양한 모양으로
퍼져나갈 여유가 늘어남

더 거친 종이 써봄,
빨대 이용해 여러가지 방울자국 만들어봄,
커피입자 더 고운 걸 써봄.)

"거품자국이 레이디오헤드 앨범커버를 떠올리게 만든다"

Jeudi

12 30-13

How does our project link with society/human experience?

Our thoughts:

(What are we as individuals and a collective at the same time?

What did we mean by 'Bon appetit'?

ink: changes over time, organic-life?)

13-13 10

break

13 10-13 40

How are we going to set the environment

in which the participants take part in our project?

(-main thing: unpredictable, unintentional-?,)

Discussion

cliché word.-?-The most predictable?-but ironically,
what we meant was the most unpredictable-it highlights our
meaning by the irony

+

an opportunity for the audience to think. That's the title of
this work? Like really? -Can come up with all sorts of interpretations

There is no owner.

we are the people who simply prepares the ingredients,

and the art is made by itself.

-ownership to the participants

Bon appetit!-Enjoy! Go crazy!

opportunity to be an artist.

Recherche

research on philosophie en actions,
esp. unpredictability, changing over time)

The philosophy of action is a branch of philosophy that deals
with problems related to human action,
its nature,

motivations, and intention.

(unpredictability-the unconscious?)

It was notably developed in the 20th century

within the tradition of analytic philosophy. Some of the most debated questions concern:

is it necessarily a bodily movement?

does intention characterize the action?

relationships between intentions and

reasons and causes ?

-My experience:

the choice made by itself while imagining

that I am the one making the choice

(Water flows, don't know where the source is, geography. if rain falls on this,

we're making unpredictable land. We made some mistakes, too. It's like

our life. In Yang-simple-

Sometimes without purpose, it magically turns out how we wish.-Even if the

outcome is bad, that's exactly what we're trying to say.

That's how it was meant to

be.)

But then, there are choices that I build up the strength to make

-Realizing my desires, Honesty in communicating.

Simulation prep

15:00-15:30 Before the simulation

- install 3 empty buckets on the grass
- so that it's easy to get together around each of them
- and mix coffee
- install portions of coffee powder next to each bucket
- install portions of savon de la vaisselles next to each bucket
- put the metal straws one inside each bucket

1. Boil tap water on the pot

- take out the pot from the bag, bring it to the bde cuisine
- open the tap from the sink while holding the pot
- put it on the stove, maybe find a plate to put on top
- set a timer for 5 minutes

-install my water bottle with hot water inside and
the pot(s) used for the boiling with more hot water
in the center surrounded by the three buckets

-install the paper rolled up in 3 meter distance

- ask pascal for the camera and stand
- check sd card and battery life
- install in wide view so we can see the whole process

16:00+ simulation

2. Let the participants mix their own coffee

-show them an example with a little piece of paper or a video
so they get the idea

-We join in as well as the others

3.-We bring the rolled up paper beside the mixing buckets,
and roll it open down on the ground

4. We set an example by Holding opposing corners of the
paper. Not everyone has to participate. Ask them if they could
take pictures or videos of what's happening.

5. One by one, we let one volunteer spill coffee on the paper,
Then we try to tilt it together under the volunteer's direction

6. We wait until their done, and we move onto the next volunteer
